REASONS FOR ALLOWANCE

1. Claims 1, 2 and 5-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - a. Claims 1-2 include the limitation of the first processor is further configured to have a plurality of normally open logical service switches, wherein said first set of services are unavailable to said second processor during bus enumeration from said first processor to said second processor while inter-processor communication services continue between said first and second processors, which is not shown by the prior art of record, in the combination as disclosed and claimed. The Examiner interpreted the claims in light of the Specification and further in view of Applicant's persuasive argument that "In contrast, the Moran, et al. publication, the USB Specification and the Lin patent do not describe or suggest switches that cause services to be unavailable to the second processor during bus enumeration between processors while inter-processor communication services continue between the processors, as required by amended claim 1. Claim 1 is directed to switches that manage available services for a dual processor architecture having a physical USB link without causing a breakdown or loss of communication in the USB link and re-enumeration between processors. On the other hand, in existing USB enumeration, the old configuration set is removed, thus breaking the communication link, in order to set a new configuration set (page 8 of the Remarks).
 - b. The reasons for allowance of claims 5-7 had been provided in the previous Office Action(s).

Art Unit: 2112

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
